

**IN MEMORIAM - PROF. MOHAMMAD SHAFIQUE (1936 - 2022)**

***DR. MOHAMMAD IDREES<sup>1</sup> AND MIAN MUKHTAR-UL-HAQ AZEEMI<sup>2</sup>***

<sup>1</sup>Prof of Psychiatry & Behavioural Sciences, Peshawar Medical College Peshawar, Pakistan

<sup>2</sup>Department of Psychiatry, Lady Reading hospital, Peshawar, Pakistan

We share the news of Professor Mohammad Shafique's passing with great sorrow. On the 2nd of August, 2022 at his home, our dear mentor and teacher passed away. Dr. Shafique was a pioneer for psychiatry in Pakistan, most notably his contributions were in the KPK province.

He was the third Psychiatrist in Pakistan and first in KPK. He was a true Messiah to his patients and a role-model to his students. Like his name, he was the embodiment of kindness and compassion. He paved the way for future psychiatrists of the country by transforming psychiatric teaching and patient care as it was known. Many psychiatrists in Pakistan today have been mentored and taught by Dr. Shafique. He has been regarded as the father of psychiatry in Pakistan.

In 1961, he went to England to pursue higher training in the field of Psychiatry, where he trained under Dr. John Hughes and Dr. Andy Wills at St. Cadoc's Hospital in Cardiff, Wales. He received his Doctor of Psychological Medicine degree and returned to Pakistan in 1964 to accept the post of Medical Superintendent at Dhodial Mental Hospital. He developed it into a fully functional mental hospital and revolutionized psychiatric patient care across KPK by building new foundations for the system to stand on. Later on, he was made the Medical Superintendent of Peshawar Mental Hospital and he established the psychiatric OPD at Lady Reading Hospital. His efforts inside and outside the hospital changed the perspective on mental illness in KPK and across the country.

In 1976, he was posted as an assistant professor of psychiatry at Khyber Medical College until his retirement as professor in 1996. He initiated postgraduate training in psychiatry, thus paving the way for specialization in the field. He acted as a UN authorized provincial coordinator for the WHO task force on drug abuse and treatment. Eventually, he became a member of the public service commission and was made honorary group captain by Pakistan air-force. In 1985, he received MRCPsych and FRCPPsych from the Royal College of Psychiatry UK for his exemplary services.

A huge gathering of patients, colleagues, students, friends and family has been left behind in fond remembrance of moments shared with such an exceptionally revered and comforting figure. The psychiatric community has been most certainly blessed in having the honor of his life-changing presence among us.

Dr. Shafique had a way about enrapturing his audience and whenever he spoke, the masses would hear as if spell-bound. Not only was he great with his words, but he was even greater in caring for the voices of others and left no one unheard.

Together, we grieve the loss of Dr. Mohammad Shafique who has led us all by example, and we continue to live by his reverent memory. May the Almighty bless his soul and his family with whom we share this grave loss. He is succeeded by his wife Dr. Jamal Ara, two sons Dr. Fahad and Dr. Asad and his daughter Dr. Sadia.
