

INVEST IN WOMEN

DEPARTMENT OF FINE ARTS, DHACSS COLLEGE FOR WOMEN, KARACHI, PAKISTAN.

Women constitute about half of the world's population, yet they often face systemic barriers that limit their full participation and contribution to society. By investing in women, we can unlock their immense potential and accelerate development on a global scale. This investment can accelerate progress across various sectors, including economic growth, education, healthcare, political participation, technology, and gender equality. Supporting women entrepreneurs stimulates job creation and innovation, while investing in girls' education leads to long-term societal benefits. Improved healthcare access for women enhances maternal and child health outcomes, and promoting women's involvement in politics fosters inclusive decision-making. Investing in women for STREAM fields (Science, Technology, Reading, Engineering, Arts, and Mathematics) drives innovation and initiatives for gender equality and addresses issues like discrimination and violence. Thus, investing in women is not only a matter of social justice but also a strategic imperative for achieving sustainable development and promoting mental health globally. By empowering women, we can create more resilient, equitable, and prosperous societies for all.

DHACSS College for Women (DCW) is a multidisciplinary college that was founded in 1990 with the mission of providing young women with a wholesome education to equip them for the challenges of the future. Since its humble beginnings, DCW has progressed significantly, grown in reputation, and experienced incredible success. It is now recognised as one of the best contemporary institutions for maintaining exceptional academic standards. This artwork was created for one of the convocation ceremonies of DCW.
